

Glow Innovations has been specialising in the manufacturing and installation of steel security products for over ten years. All our products are custom made to suit your requirement and engineered to last.

We are situated in Diep River, Cape Town and have the capacity to handle the fabrication of any steel related product from big to small. Our suppliers are reputable and all products and workmanship are guaranteed.

All our staff members are permanent employees who are proud to be team members of Glow Innovations. We are registered with the MEIBC and operate a clean factory. We adhere to written quotations and agreed deadlines as we know how frustrating broken promises can be.

So if you are enquiring about burglar bars, pedestrian gates, driveway gates or fencing we can assist you with professional advice and free no obligation quotations. We also offer automation and access control accessories to accompany these security fittings.

Our products are not limited to security based applications as we also fabricate balustrades, staircases, structural steel beams and columns for the building industry, pergolas, garden trellis, or anything you would like us to custom design and manufacture from either mild steel or stainless steel.

Staying abreast to new technology is also very important to us. We are always on the look out for new products we can implement to enhance endurance and functionality of your security solution.

We hope you enjoy browsing through our website and hopefully our product gallery can give you some ideas for the steel or related product you have in mind.
